

Install Urdu Phonetic Keyboard (v1.0)

All the blue colored links in this PDF are click-able to access download files.

Step 1) From <http://www.deedahwar.net/download.html> Download and run [Urdu Phonetic Keyboard Installer](#).

Windows Vista or Windows 7

If you are using Windows Vista, after installing the above keyboard you can type Urdu on your Windows Vista Computer. To switch between Urdu and English keyboard, you can press **Alt+Shift**. Or on your taskbar you can see **EN** or **UR** and click on it to select the language as shown in this figure:

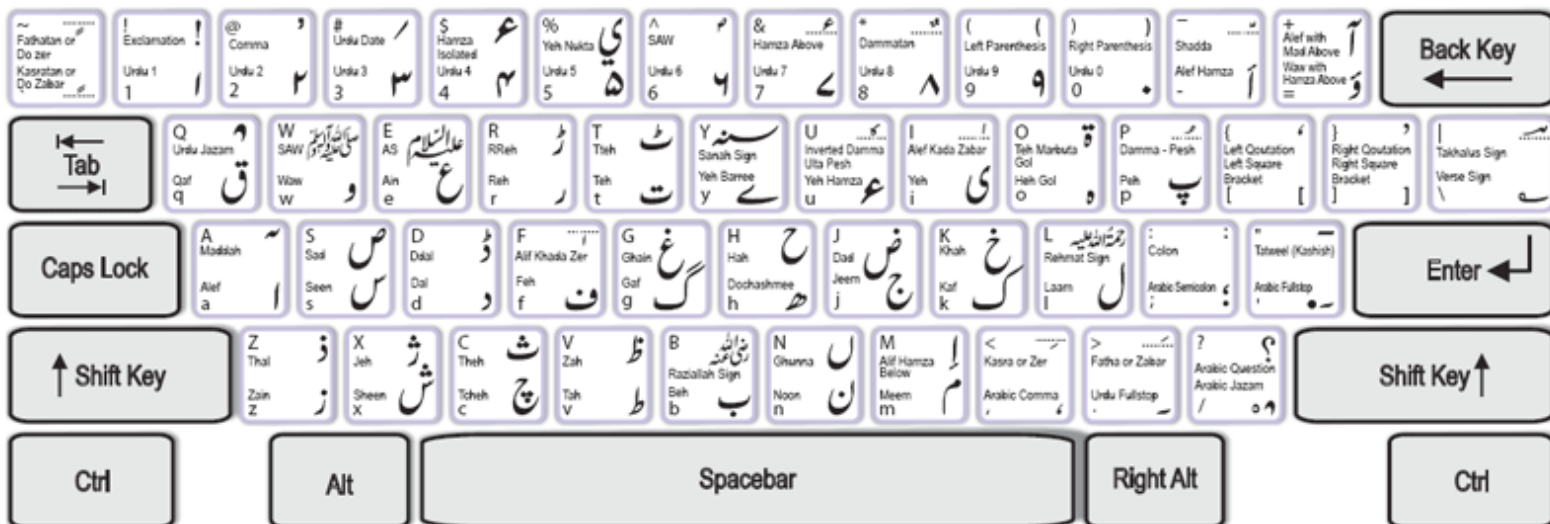

Windows XP

If you are using Windows XP, you need to follow [Windows XP procedure](#) to enable Unicode Urdu in Windows XP.

Keyboard Layout

You can also download and print this [Urdu Phonetic Keyboard Layout](#)  for your reference. This page explains which key has alef, bay, pay etc. Here is the low resolution image:

Urdu Phonetic Unicode Keyboard Layout (With SHIFT) (for regular Urdu alphabets)

RightAlt with Right SHIFT (for special characters including symbols in Holy Quran can be typed by pressing Right Alt key)
